The invention

The subject matter of the claimed invention is related to improving the user interface of digital devices having Chinese character keys for input. More particularly, the invention is related to a method for numerically encoding the Chinese characters by decomposing them into six unique code elements where the six code elements are mapped onto six numeric keys.

**DETAILED ACTION**

***Priority***

Applicant's claim for the benefit of a prior-filed application under 35 U.S.C. 119(e) or under 35 U.S.C. 120, 121, or 365(c) is acknowledged. Applicant has not complied with one or more conditions for receiving the benefit of an earlier filing date under 35 U.S.C. 119(e) as follows:

Acknowledgment is made of applicant's claim for foreign priority based on an application filed in China, Singapore and UK on 2/16/04, 8/18/04 and 9/3/04 respectively. It is noted, however, that applicant has not filed a certified copy of the claimed foreign applications as required by 35 U.S.C. 119(b).

***Oath/Declaration***

The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:

The specification to which the oath or declaration is directed has not been adequately identified. See MPEP § 602.

It does not identify the foreign application for patent or inventor's certificate on which priority is claimed pursuant to 37 CFR 1.55, and any foreign application having a filing date before that of the application on which priority is claimed, by specifying the application number, country, day, month and year of its filing.

### ***Claim Rejections - 35 USC § 112***

Claims 2, 5, 8 and 10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 2, the phrase "such as" renders the claim indefinite because it is unclear whether the limitations following the phrase are part of the claimed invention. See MPEP § 2173.05(d).

Regarding claims 5, 8 and 10, the phrase "for example" renders the claim indefinite because it is unclear whether the limitation(s) following the phrase are part of the claimed invention. See MPEP § 2173.05(d).

Claims 1-11 are rejected as failing to define the invention in the manner required by 35 U.S.C. 112, second paragraph.

The claim(s) are narrative in form and replete with indefinite and functional or operational language. The structure which goes to make up the device must be clearly and positively specified. **The structure must be organized and correlated in such a**

**manner as to present a complete operative device. The claim(s) must be in one sentence form only. Note the format of the claims in the patent(s) cited.**

***Claim Objections***

Claims 2- 11 are objected to because of the following informalities:

Claims 2-11 are objected for lack of antecedent basis of method in claim 1.

Specifically claim 1 claims the system but it is referred as a method claim in the corresponding dependent claims.

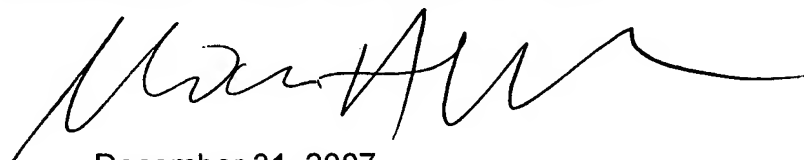

Also in claim 1, it appears that the phrase "less **then**" on line 8 was meant to be "less than". Appropriate correction is required.
